

## **Pascal Kehl, Switzerland**

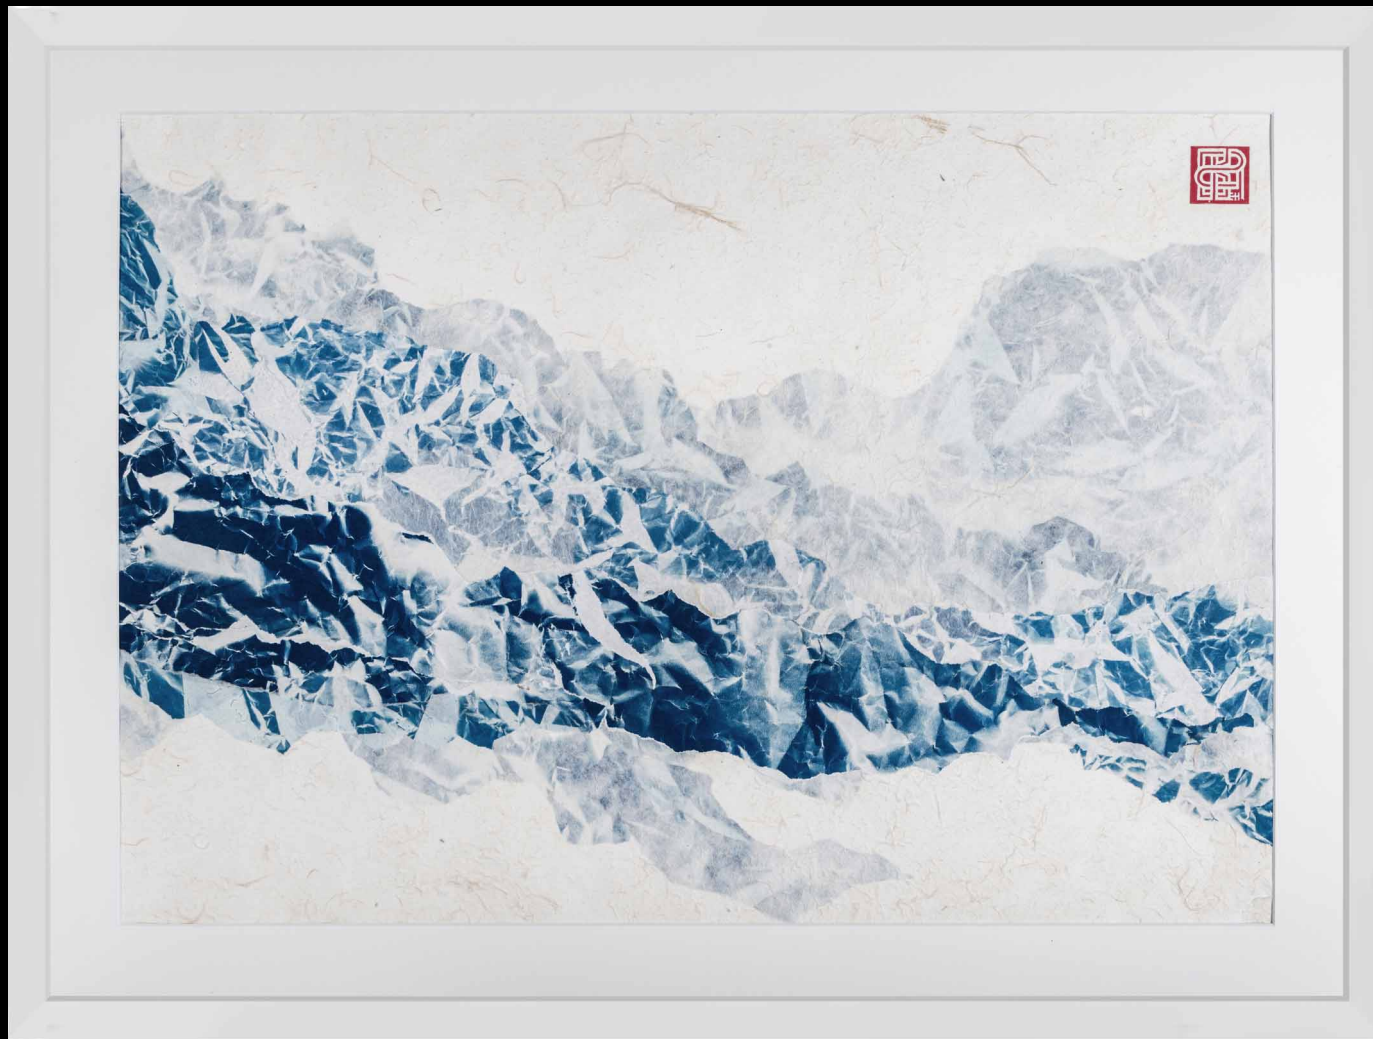

Driven by a general interest since 1974, I, as the son of a French mother and a Swiss photographer, went to the School of Design in Zurich (now ZHDK) a long time ago and concluded my education as a graphic designer (Illustrator and photographer). After a period abroad, I spent several years freelancing for various reputable advertising agencies, establishing my own studio in Glattbrugg, and accumulating over 25 years of work experience.

For the past 15 years, I have dedicated myself increasingly to my artistic side, organizing exhibitions and receiving positive feedback in Switzerland and France. I have collaborated with diverse artists and galleries and actively support creative projects.

My passion for 19th-century historical photographic techniques and the craft of papermaking, along with my ongoing interest in artisanal craftsmanship and the handmade, has bestowed valuable skills upon me.

Additionally, I occasionally participate as a supporting actor in films, document my travels through photography, and lend a hand, within my capabilities, as a craftsman, teacher, sparring partner, advisor, and more.

I love being creative, be it in the realm of art or other fields. My journey is characterized by continuous research, learning, and experimentation.
